

We get your projects  
on the road

**NV- EnerTech**  
Consultant & Engineering GmbH

# About us...

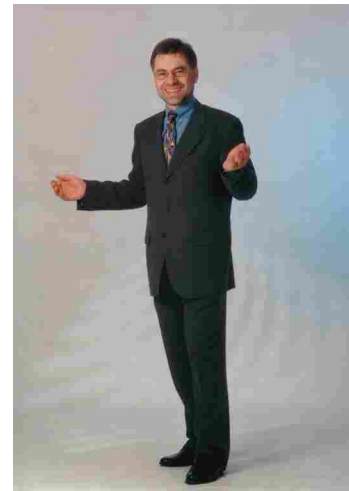

The NV EnerTech GmbH takes care for its customers needs, day by day. That's what our Customers appreciate. The reason for our acting is plausible. Because the needs of our customers are our drive.

Compromises take place, when it comes to diplomatic decisions. But never, when it comes to our customers success.

In the areas of engineering, construction supervision, start-up and programming, we are a reliable partner.

The world changes every day. Also the requirements for success do. We know that, and our coworkers as well.

So, our team does not only grow in quantity, but most of all in quality.

The customers of the NV-EnerTech GmbH, whether new or already for years with our predecessor company PRISMA Energieanlagen & Umwelttechnik GmbH appreciate in the first place our flexibility in all areas of projecting, planning and line-up of industrial plants.

We are acting globally. Globalising is a challenge, which we faced with success.

We are doing our job in all segments, because projecting is completely managed by us. From A to Z. The whole coordination stays in our hands. Efficiency and partnership mark the way we are going with our customers and partners.

With best regards  
Yours NV-EnerTech GmbH

Volker Marquard  
Geschäftsführer

# Our History...

## 2001

Prisma becomes NV-EnerTech  
To be more efficient, some of our subsidiaries were bound together to the new NV-EnerTech GmbH

## 1998

**PRISMA** is acting globally

## 1997

Establishment of the division safety technologies

## 1995

Establishment of the division construction and planning

## 1992

Extension of the divisions on boiler plants

## 1987

Founding of the engineer's office **PRISMA** as a GmbH

# The achievement potential

Engineering

Construction

Consulting

Supervision

Start-up

Documentation

Safety-coordination

Programming

# A central constant consulting and engineer's office

The development never stands still. Especially not in those areas where we prove our abilities day by day. On those permanent changes we react with consequent training.

Our coworkers become trained in:

- Courses with developers
- Through training "on the job"
- In seminars and special courses

We are investing 3,0% of our revenue. We believe this is worthwhile.

With our well trained coworkers you are able to reduce your costs, because our personell knows how to get the job done.

Of course we make our coworkers available in all areas.

So, our customers don't have to worry about sickness or anything else.

Our coworkers concentrate on the substantial things.

An advantage that saves time and power.

# Our core authorities

Variety and flexibility are our constant way companions to success. From the single project to the total package, which covers all contents in the areas of project engineering, planning and start-up of industrial plants, we deliver authority and knowledge.

The emphasis of our services was divided into three ranges:

<b>Technic</b>	<b>Environ. Management</b>	<b>Safety</b>
Consulting	Consulting	Safety planning
Projecting	Projecting	Safety coordination
Engineering	Completion	Planning
Completion	Planning	Controlling
Planning	Controlling	Safety-Engineering
Supervision	Training	Documentation
Controlling	Documentation	
Start-up		
Training		
Documentation		
Service		

# Our Services

In all segments, the NV-EnerTech GmbH is working in, we offer complete solutions which are perfectly tailored to our customers needs. Without any doubt our independency is a further advantage for you.

The principle is simple:

Our customers show us the target and we show you the way to get there.

Our services circumscribe the following areas:

<b>Construction</b>	<b>Electrotechnics</b>	<b>Engineering</b>
Generators	Heavy current	Environmental audit
Heating plants	Weak current	Safety technologies
Incineration plants	Electrotechnics	CE-marking
Sewage systems	Automatic control	
Piping	Controlling	
Purifications plants	Instrumentation	
Tank construction
