The Company

Since 1987 NV-EnerTech GmbH & Co. KG (formerly Prisma GmbH) has been active in the field of planning, design, construction, management and commissioning of industrial plants. Our range of services includes mechanical, instrumentation and control technologies, as well as electronic services. Right from the start energy and environmental technology has played an important key role in the company's activities.

We control and coordinate the complete implementation of the project. Your contact always remains the same, even if the tasks and objectives change.

You know that you are on the right path when you see how quickly we can adapt to the numerous machines and systems in various industries with their ever-changing control, regulation and design concepts.

So it just works!

Your order is our business

The satisfaction of leading companies is our best reference.

Our clients include:

NV-EnerTech®

Consultant & Engineering GmbH & Co. KG

Why work with us?

External services are not more expensive

You only pay for the hours worked, and you save, for example:

- Costs of personnel procurement
- Costs of personnel administration
- Costs of personnel reduction

Our personnel meet your requirements

You can make doubly certain:

- You will receive an employee profile before the order is placed, so that you can decide
- You can change our personnel regardless

Our personnel are qualified

They are well-educated, flexible and have acquired in-depth professional experience during their work on various projects.

We work according to your guidelines

For us observing your standards and rules is taken for granted and this assures you of a high level of application standardisation and overview.

Training is important

Our employees undergo further training:

- On courses at computer manufacturers'
- Through training "on the job"
- In seminars and specialised courses

We assure confidentiality

All employees are committed to protecting confidentiality in accordance with the data protection law.

What we have started we will finish

You decide when our involvement comes to an end. No personnel will be taken off the job against the wishes of the customer.

Our Strength - Your Security!

Our Services for You!

Know-how technologies

Are you considering re-planning or expanding your company? Quotations from the various suppliers are often confusing or incomplete. Thanks to our many years of experience, we are in a position to advise you as early as this stage of a project, to arrange the expertise required and to prevent you from running into trouble.

Advantages for you

As an independent technical office, we carry out all the tasks you assign to us. Furthermore, we not only compare data, but take practical experience into consideration in our assessments.

What you need to do

Please contact us as soon as you start considering these aspects. We will help to draw up specifications and tender documents, and we can assist you in solving your problems on the basis of our diverse experience.

Implementation

During the project implementation stage you, as the customer, should always be in a position to carry out an independent and objective assessment of the current status of your project using highly qualified monitoring personnel.

This should not be taken as mistrust of your customer, but should represent a feeling of security for the success of the project for all parties concerned.

Advantages for you

Specialists in civil and industrial construction, factories, pipelines, organisation and more, are at your disposal.

The money spent on such supervision is more than covered by the savings achieved.

What you need to do

Please inform us as early as possible about your Deadlines and qualification requirements, so that we can plan the deployment of our highly-qualified staff for you in plenty of time.

Our Independence - Your Success!

NV-EnerTech®

Consultant & Engineering GmbH & Co. KG

Our Services for You!

Project support

For us, project support means letting our personnel assist in working on solutions directly in your company. This kind of work is always especially effective when:

- commercial and/or technical demarcation is not possible or is too expensive;
- the information gap may be too great;
- working principles are local;
- immediate access to the knowledge of our personnel is required;
- order criteria make it difficult to use your own staff,
e.g. reintegration after long deployment elsewhere;
- qualifications and experience are necessary that are
not currently available in your company;
- constant contact with the production facilities is required;
- you need to safeguard deadlines against manpower shortages.

Advantages for you

The solution of all the above-mentioned problems. Payment for the services of our personnel is based on the actual work done. This means that you only pay for the hours worked at the agreed hourly rate. All times our personnel are not available, because of seminars, holidays, illness, etc. are covered by our company.

What you need to do

Simply contact us, as this kind of cooperation in conjunction with our strengths and qualifications can only be of advantage to you.

Further Advantages for You!

Personnel reserves

One of your employees is not available during the project due to illness or leaves your company. For you this means a delay to the project as you look for a new employee (advertisements, interviews etc.) while continuing to work on the project with all the risks associated with using new personnel. Leave this problem to us. With our potential personnel we are able to promptly offer a qualified replacement, so that you can focus on implementing the project.

Up to date on the job market

If your projects are being carried out by our personnel, due to their versatile practical knowledge, they will be in a position to propose new solutions for implementing the project. For you, this means that they do not have a blinkered view of the company. We are responsible for our personnel. They come to us when they want a pay rise, need holidays, overtime paid or a performance bonus. How much working time do you spend on looking after your own personnel and dealing with any problems? We do all this for you indirectly! Furthermore, we can inform you about current job market trends (e.g. salary levels, education, etc.). Please contact your advisor at NV-EnerTech GmbH & Co. KG.

Financing in advance

Finally an important fact for any entrepreneur: Through our services we provide advance financing of your project – just pay your personnel's salary punctually – and you can pay us after the project is finished or in accordance with the actually performed work.

Personnel procurement

On this page, we would like to point out some of the benefits you enjoy if you choose to work with NV-EnerTech. You may take advantage of them unconsciously but it is these benefits in particular that facilitate the implementation of the project. These factors save you a lot of work and trouble and therefore they have to be taken into consideration in your cost calculation. You will then see that the cost difference is relatively small. From practical experience you know how much effort is involved in finding qualified personnel.

- You have to advertise several times – and this means not inconsiderable advertising costs
- You have to interview the applicants, building-up a picture of their professional and personal qualifications. This takes up a lot of your own working time.
- You have now found the right people, but their salary expectations do not fit in with your salary structure
- Or the applicant cannot start work when your project begins.
What do you do?

Postpone the project?

All these problems are solved when working with us. We plan the suitable personnel for the start of your project.
You know how much time and money you can save!

Further training

We are responsible for our employees' training so that they are optimally prepared for your project. We bear the training costs – neither the work involved nor the financial costs are your concern.

**NV-EnerTech GmbH & Co. KG –
So it just works!**

Your Trust in Us - Our Aim!

Competence for our customers

Demand-orientated growth and constant adaptation to new challenges go hand in hand with efficiency. We are there for you!

We will accompany you on the path to success, achieving the objectives of your project through the strict self-monitoring of our experienced personnel.

Our company stands for flexibility / innovation / reliability

Flexibility...

- For international projects
- In adapting to your needs
- In reacting to difficult requirements on site

Innovation...

- Our engineers carry out your project planning
- In adapting to your project
- In dealing with short-term changes in requirements for our customers

Reliability...

- Of our specialists working for you on site
- In attending to your working processes
- In keeping to your project schedules

This means

Being ready to guarantee optimum quality and reliability through a process of constant improvement. This must take place as part of a competitive cost structure.

We know the way - let's get there together!
